

# Aquality Water Cooler

# Aquality Water Cooler

**Aquality, the new efficient and solid point of use water cooler, is simple to run and maintain. The product offers great flexibility in terms of available cooling technology and finishes; direct exchange or reservoir cooling, skinplate or stainless steel cover and a wide range of compatible filters. The simple and clean lines of the design and the dominance of metal give the product a modern, technological appearance.**

#### Performance

- Direct chill system
- Unrivalled hygiene
- Integrated cup dispenser
- Distribution point remains germ-free
- Space for CO2 gas cylinder (version WG, optional)

#### Additional features

- No taps to sanitize
- Ergonomic design
- Easy to disassemble
- Covered dispensing points
- Entire, end-to-end water path is protected

**Available with either a direct chill or tank cooling system to guarantee an optimal balance of efficiency and functionality.**
