

CV151 Vertical Waste Compactor

CV151 Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV151 is supplied with a mechanical bale ejection and four rolls of baling cord

Benefits

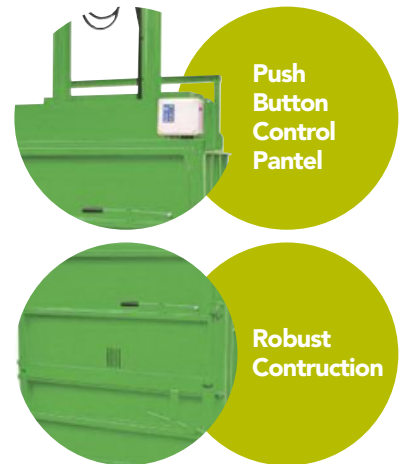

- User friendly
- Saves labour time
- Enables flexible siting
- Ensure long life of machine
- Improved health and safety
- Built to high safety standards
- Excellent mid range machine
- Informs operator when bale is full
- Saves time when baling and improved safety
- Allows machine to be situated indoors or outdoors
- Produces an excellent plastic & cardboard bale

Features

- IP55 rating
