

CV151LUD Vertical Waste Compactor

CV151LUD Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV151LUD is supplied with 4 rolls of baling cord and a mechanical bale ejection.

Benefits

- User friendly
- Large feed opening
- Enables flexible siting
- Ensure long life of machine
- Built to high safety standards
- Excellent mid range machine
