

CV500V Vertical Waste Compactor

CV500V Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV500V is supplied with 1 bundle of wire to make up to 20 bales, hydraulic bale ejection and an emergency stop.

Benefits

- User friendly
- Saves labour time
- Ability to sell bales
- Minimal downtime
- Improved health and safety
- Built to high safety standards
- Produces a 500kg Mill Size Bale
- Informs operator when bale is full
- Easy to use diagnostic touch panel
- Machine can be placed against a wall
- Suitable for premises with substantial waste

- Automatic cycle
- Press plate support
- Robust construction
- Advanced tying system
- Visual bale full indicator
- Push button control panel
- Produces up to 500kg bale
- 2 Hand safety for bale ejection

Optional Extras

- Vandal proof cover
- Electronic bale full indicator
- Rams dropped for low transport height

Features

- IP55 rating
- CE Marked

Technical Specification
