

CV500VLUD Vertical Waste Compactor

CV500VLUD Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV500VLUD is supplied with 1 bundle of wire to make up to 20 bales, hydraulic bale ejection and an emergency stop.

Benefits

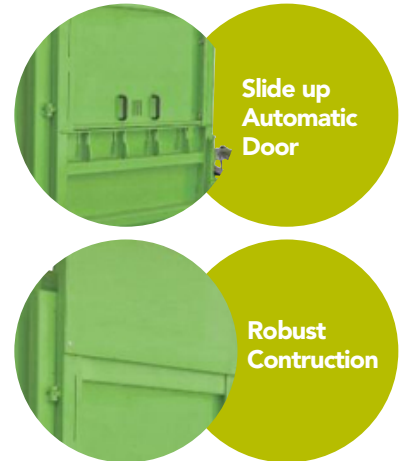

- User friendly
- Saves labour time
- Ability to sell bales
- Minimal downtime
- Improved health and safety
- Produces a 500kg Mill Size Bale
- Informs operator when bale is full
- Bale dimensions excellent for loading 3 high on a curtain sider
- Door will automatically open after cycle is finished leaving it ready for the next load
- Suitable for premises with substantial waste
- Same features as CK500V but with a Lift up Door.

Features

- IP55 rating
- CE Marked
- Automatic cycle
- Press plate support
- Robust construction
- Advanced tying system
- Visual bale full indicator
- Push button control panel
- 2 Hand safety for bale ejection

Optional Extras

- Vandal proof control cover
- Electronic bale full indicator
- Rams dropped for low transport height

Slide up Automatic Door

Robust Construction
