

CV500W Vertical Waste Compactor

CV500W Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV500W is supplied with 1 bundle of wire to make up to 20 bales, hydraulic bale ejection and an emergency stop.

Benefits

- Three phase
- Minimal downtime
- Huge feed opening
- Extra retention claws
- Built to high safety standards
- Informs operator when bale is full
- Allows feeding of bulkier material
- Saves on space and easier feeding
- Bale dimensions excellent for loading 3 high on a curtain sider
- Produces mill size bales of cardboard up to 550kg
- Automatic opening allows for ease of loading

Features

- Slide up door
- Automatic cycle
- Press plate support
- Wide feed opening
- Robust construction
- Advanced tying system
- Visual bale full indicator
- Produces up to 550kg bale
- 2 Hand safety for bale ejection

Optional Extras

- Vandal proof control cover
- Electronic bale full indicator
- Rams dropped for low transport height

Technical Specification

Model	Footprint	Height	Bale Height	Bale Footprint	Bale Weight
CV500W	2110x1200	3060 mm	1050	1550x830 mm	Up to 550kg cardboard
