

# CV50L Vertical Waste Compactor

# CV50L Vertical Waste Compactor

Vertical balers are used in factories, shop forecourts and yards. All the machines are weatherproof and have a vandal proof option available.

The machines that produce bales up to 150kg are single phase, the 250kg and 500kg balers run off 3 phase electricity.

The Standard CV50L is supplied with 2 rolls of baling cord and a trolley for bale discharge.

#### Benefits

- User friendly
- Saves labour time
- Robust construction
- Fully-automatic cycle
- Enables flexible siting
- Suitable for small areas
- Ensure long life of machine
- Low height version of CK51
- Built to high safety standards
- Easy to use diagnostic touch panel
- Low height for standard door clearance
- Allows machine to be situated indoors or outdoors
- Low height machine fits through any standard door

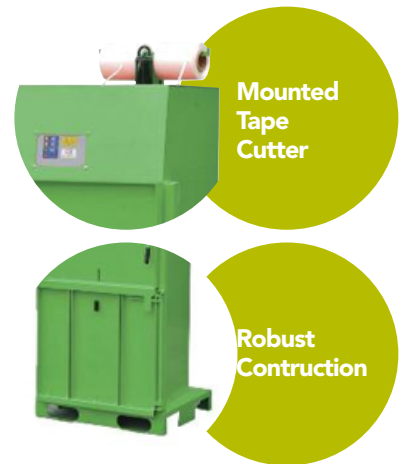

- Produces an excellent bale of cardboard up to 70 kg
- Saves time when baling and improved safety

#### Features

- IP55 rating
- CE Marked
- Single phase
- Automatic cycle
- Robust construction
- Push button control panel
- Door mounted tape cutter and easy tie system

#### Optional Extras

- Extra trolley
- Vandal proof control cover

#### Technical Specification

Model	Footprint	Height	Bale Height	Bale Footprint	Bale Weight
