

Niagara Water Cooler

Niagara Water Cooler

All versions of the Niagara are fully certified and feature state-of-the-art technology, making this model perfect for the instantaneous provision of very large quantities of water.

Performance

- Dose Counter monitors output
- Water protected to the dispensing area
- Ice-bank cooling system (no stagnation)
- Adjustable digital water output quantity
- Room temperature, cold still and cold sparkling options

Additional Features

- Internal anti bacterial UV System (optional)
- Optional alarm linked to the Dose Counter
- Silent, professional cold-carbonation system
- Perfect for the instantaneous provision of very large quantities of water

Ideal for demanding environments in which high volumes of drinking water are regularly consumed.
